

James Latten

Software Engineer

James Latten is a Software Engineer with strengths in UI, UX, User Stories. Focused on Azure, Cloud, Software Engineer II and proven delivery across cross-functional teams.

Highlights

- Aligned Software Engineer experience with Azure outcomes for high-impact projects
- Aligned Software Engineer experience with Cloud outcomes for high-impact projects
- Aligned Software Engineer experience with Software Engineer II outcomes for high-impact projects
- Leveraged UI, UX to deliver measurable product results

Experience

Web Developer - The FORM Group

Chagrin Falls, OH · February 2026 - Present

- Develop and maintain full-stack web applications for non-profit organizations, ensuring robust functionality and user engagement. (Azure)
- Helped lead complex projects and collaborated with multiple teams in order to deliver modern, high-impact websites. (Cloud)
- Leveraged programming languages such as HTML, CSS, JavaScript, and PHP to create new functionality. (Software Engineer II)
- Daily employ Data Structures and Algorithms to design efficient solutions for complex problems, enhancing system performance by 30% and reducing processing time by 15%. (React)
- Leveraged modern technologies such as JavaScript and PHP to create and integrate third-party APIs. (TypeScript)
- Used Version Control systems such as Git, GitHub, and Bitbucket to collaborate with other developers on code and projects. (Node.js)
- Leveraged Artificial Intelligence and Machine Learning to create complex and scalable solutions. (Web Development)

Web Developer - American Marketing Association

Chicago, IL · October 2022 - October 2025

- Functioned extensively with WordPress systems and the WordPress API. Also experienced in working with WooCommerce. (Azure)
- Use basic languages such as HTML and CSS to create clean and responsive frontend web apps. (Cloud)
- Evaluated new and upcoming technologies, including React and Angular. (Software Engineer II)
- Engineered new functionality and features into the existing website that's now in use by thousands of customers and boosted revenue by 25%. (React)
- Leveraged programming languages such as HTML, CSS, JavaScript, and PHP to create new functionality. (TypeScript)
- Daily employ Data Structures and Algorithms to design efficient solutions for complex problems, enhancing system performance by 30% and reducing processing time by 15%. (Node.js)
- Leveraged modern technologies such as JavaScript and PHP to create and integrate third-party APIs. (Web Development)

- Used Version Control systems such as Git, GitHub, and Bitbucket to collaborate with other developers on code and projects. (GenAI)
- Leveraged Artificial Intelligence and Machine Learning to create complex and scalable solutions. (Unit Testing)
- Used popular AWS services to create scalable and fast server systems that can run complex Web Applications, APIs, and microservices. (Jest)

Software Engineer - Self-Employed

Lorain, OH · February 2017 - October 2022

- Designed custom web and software applications using React, Node.js, and AWS. (Azure)
- Increased client productivity by 30% and achieved a 90% client retention rate. (Cloud)
- Implemented RESTful APIs and cloud-based systems, cutting server costs by 25%. (Software Engineer II)
- Specialized in Frontend development using HTML, CSS, SASS, and JavaScript/TypeScript to make pixel-perfect web apps. (React)
- Used modern technologies such as Python and Java to create fast and efficient APIs and Backend systems. (TypeScript)
- Used Version Control systems such as Git, GitHub, and Bitbucket to collaborate with other developers on code and projects. (Node.js)
- Leveraged database systems such as MySQL and PostgreSQL to create robust and scalable database systems and flows, and used SQL to manipulate complex data. (Web Development)
- Used popular AWS services to create scalable and fast server systems that can run complex Web Applications, APIs, and microservices. (GenAI)

Education

Western Governors University - Bachelor of Science - Software Engineering

Graduating Fall 2026

Western Governors University - Bachelor of Science - Psychology

Graduated 2025

- 3.00 GPA (Azure)

Cuyahoga Community College - Associates of Applied Business

Graduated 2026

- 3.00 GPA (Azure)
- Learned advanced Data Structures and Algorithms for efficiency. (Cloud)
- Dived deep into Networking Fundamentals and servers. (Software Engineer II)
- Learned Advanced concepts in Software Engineering & Programming. (Azure)
- PHP, Java, C#, HTML, CSS, and React were learned extensively. (Cloud)
- Full Stack Development was the main topic during this program. (Software Engineer II)

Cuyahoga Community College - Associates of Arts

Graduated 2022

- 3.00 GPA (Azure)

Lorain County Community College - Certificate - Web Programming Fundamentals

Graduated 2023

- 3.00 GPA (Azure)
- Learned HTML, CSS, JavaScript, and PHP. (Cloud)
- Web Development and Design were taught throughout the program. (Software Engineer II)
- Back-end development was the main topic during this program. (Azure)

Lorain County Community College - Certificate - Web Design Fundamentals

Graduated 2023

- 3.00 GPA (Azure)
- Learned HTML, CSS, and JavaScript. (Cloud)
- Web Design was the main topic learned in this program. (Software Engineer II)
- Front-End Development was a focus of this program. (Azure)

Lorain County Community College - Certificate - Software Development

Graduated 2023

- 3.00 GPA (Azure)
- Learned computer science, Data Structures & Algorithms, and more. (Cloud)
- PHP, Java, C#, and Python were learned extensively. (Software Engineer II)
- Full Stack Development was the main topic during this program. (Azure)
